SENIOR SOFTWARE ENGINEER | NODE.JS | REAL-TIME SYSTEMS | WEBRTC | DISTRIBUTED SYSTEMS

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of experience designing and building scalable backend systems, real-time applications, and cloud-native platforms using Node.js, TypeScript, PostgreSQL, Redis, AWS, Angular, and React. Proven expertise in WebRTC-based video streaming, remote proctoring systems, high-concurrency applications, performance optimization, and AI-assisted software development. Delivered production systems serving thousands of concurrent users.

CORE SKILLS

Node.js • TypeScript • JavaScript • NestJS • Express.js • PostgreSQL • MongoDB • Redis • AWS • WebRTC • Socket.IO • FFmpeg • Angular • React • Microservices • Distributed Systems • REST APIs • System Design • Performance Optimization • CI/CD • Generative AI

PROFESSIONAL EXPERIENCE

MERITTRAC SERVICES PRIVATE LIMITED | Senior Software Engineer | Nov 2024 – Present

- Own development and optimization of large-scale remote proctoring and online examination monitoring systems.
- Designed WebRTC and FFmpeg-based media pipelines for real-time video ingestion, processing, and monitoring.
- Developed server-side iPhone streaming capabilities enabling stable video transmission to monitoring dashboards.
- Reduced WebRTC connection overhead through peer connection reuse, improving dashboard responsiveness and scalability.
- Enhanced real-time anomaly detection processing using queue-based aggregation mechanisms.
- Improved backend API throughput and application performance for large concurrent examination sessions.
- Leveraged AI-assisted development tools to accelerate implementation, debugging, and code quality improvements.

KNEXTA TECHNOLOGIES LLP | Software Developer | Dec 2021 – Oct 2024

- Led development of a Medical Insurance Renewal Management System using Node.js, PostgreSQL, AWS S3, and AWS SES.
- Delivered automation workflows that contributed to a 200% increase in renewal sales after production rollout.
- Built event-driven services for policy renewals, proposal generation, and document automation.
- Implemented 20+ complex forms across React and Vue.js applications with advanced validation.
- Migrated legacy PHP backend services to Node.js, improving maintainability and performance.
- Designed Redis caching layers that reduced database load and improved response times.
- Developed phishing detection APIs and integrated payment gateway solutions.
- Utilized AI tools to improve development velocity, prototyping, and code quality.

KEY ACHIEVEMENTS

• Promoted to Senior Software Engineer based on technical ownership and impact.
• Delivered performance optimizations for large-scale real-time monitoring systems.
• Built systems across EdTech, InsurTech, SaaS, and Real-Time Communication domains.
• Contributed to business growth through automation and platform scalability initiatives.

EDUCATION

Bachelor of Computer Applications (BCA)
The New College, Chennai | 2018 – 2021

CERTIFICATIONS

System Design – Scalar
Getting Started with Docker
Developing SQL Databases
AI Essentials & Prompting with ChatGPT
Golang for Beginners: Data Types, Functions, and Packages
